Since the question paper will be different for each session, there is a possibility that the candidates compare themselves about the variation in the difficulty level of questions. However, it may be noted that utmost care will be taken so that all the papers are of same standard. Further, it is decided to adopt a normalization process to eliminate any such variations in the difficulty level of various sessions. The Normalization procedure that has been adopted for AP EAMCET-2017 & 2018 is being continued for AP EAMCET-2019 also.

### What is Normalization?

Normalization, as used in Indian context, is a process for ensuring the students neither advantaged nor disadvantaged by the difficulty of examinations conducted in multiple sessions. This process is based on a simple formula which has been adopted as recommended by the experts from reputed educational institutions at all India level and Universities. The process is being implemented in other all India / Nationwide entrance tests for admission into undergraduate and graduate professional courses. Normalization process ranks all the candidates across all sessions on a comparative scale. In any normalization process, the marks of the easier session may be reduced marginally and the marks of the harder paper may increase marginally on the global level, depending on the average performance in each session. If there is no much difference in the averages between two sessions then there won't be much difference in the normalized marks as well. Normalizing marks would justify the candidates while protecting their actual performance.

### EAMCET marks Normalization Process:

The main aim of the normalization is to justify the candidates who got a difficult paper compared to an easier paper. Hence, the task is to rationalize in a best possible sense and rank the candidates based on the global performance. Various national level examination bodies like JEE (Main), GATE etc. are currently adopting such normalization procedures. Correspondingly, EAMCET committee has deliberated extensively and decided to use the following normalization procedure.

Normalized Marks of the candidate

$$= \text{GMS} + \frac{(\text{Top Average Global} - \text{GMS})}{(\text{Top Average Session} - \text{SMS})} \times (\text{Marks obtained of the candidate} - \text{SMS})$$

**SMS:** (Average + Standard Deviation) of the session in which the candidate belongs to

**GMS:** (Average + Standard Deviation) of all the candidates across all sessions together

**Top Average Session:** Average marks of the top 0.1% of the candidates in the session in which the candidate belongs to

**Top Average Global:** Average marks of the top 0.1% of all the candidates across all sessions together

## Weightage for assigning merit ranks:

75% of EAMCET normalized marks and 25% of Intermediate Marks in group subjects to prepare the rank.

### **Note:**

- For Candidates having qualifying marks in AP EAMCET-2019, if after normalization, the marks(s) in any individual subject(s) become negative, then the normalized mark(s) in the respective subject(s) are treated as zero.

However, total marks in three subjects are considered as EAMCET marks.

- For the candidates for whom there is no qualifying cut off in AP EAMCET - 2019, if the marks in all the three subjects after normalization goes below zero (negative), the total marks is treated as zero and the rank is assigned based on 25% of Intermediate marks weightage. If the tie persists, then AP EAMCET – 2019 normalization marks (though negative) are considered for breaking the tie.

## Demonstration with a sample data:

The following is based on a sample data to explain the normalization process. The data is based on almost equal number of candidates in all the four sessions. The normalization is shown subject wise so that students get the benefit based on subject wise performance rather than the entire paper in a session.

**Averages and Standard Deviations in a particular session and averages of top 0.1% candidates of a particular session, Global Average and Standard Deviations of all sessions together, Averages of top 0.1% candidates in all sessions is given in Table 1. Example data of normalized marks is shown in Table 2 to Table 5.**

## **ANNEXURE – V**

### **CRITERIA FOR RANKING (AP EAMCET – 2019 “AM CATEGORY”)**

As per G.O.Ms.No 73 of Higher Education(EC.2) Department, dated 28-07-2011, the candidates who have secured qualifying marks in AP EAMCET-2019 and candidates belonging to the category of Scheduled Caste and Schedule Tribe, for whom qualifying marks have not been prescribed, shall be assigned ranking in the order of merit on the basis of combined score obtained by giving 75% weightage to the marks secured in AP EAMCET-2019 and 25% weightage to the marks secured in the relevant group subjects namely Biology, Physics, Chemistry of the qualifying examination.

For the preparation of merit list, in case of more than one student securing the same combined score obtained as mentioned above, the tie shall be resolved to decide the relative ranking by successively considering the following

- i) The total marks secured in AP EAMCET-2019
- ii) The marks secured in Biology in AP EAMCET-2019
- iii) The marks secured in Physics in APEAMCET-2019
- iv) The percentage of aggregate marks secured in the qualifying examination
- v) If the tie still persists the date of birth of the concerned candidates, the older being given preference over the younger.

The weightage of marks in the case of candidates belonging to the category of Persons of Indian Origin (PIO) / Overseas Citizen of India (OCI) Card Holders, will be decided by a committee constituted by the competent authority.
